

Think Global, Act Local

Cut out and make this windmill to remind you to keep thinking of ways that your own actions can make a difference around the world: Planting a tree or some milkweed, making a short film, or stopping the use of plastic straws are just a few of the things you can do from right here at home. Keep those ideas spinning!

Reduce plastic straw consumption.

Make sure you use a paper straw or a pencil to attach to your pinwheel! Americans throw away 500 million plastic straws EVERY DAY! How can you reduce your use of straws?

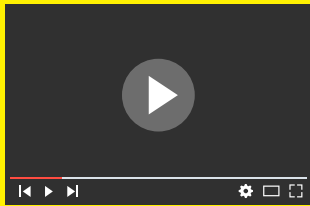

Want to grow a forest?

Raise funds with bake sales, lemonade stands, car washes, and lunch time games - every dollar plants a tree in Kenya. Celebrate your success by planting a tree at your school with the Nobelity Project!

Short Films, Big Changes.

Film your own documentary about an issue that's important to you. Share your work with classmates, teachers, family, and more!

Help Migrating Monarchs.

Monarch butterflies are threatened by climate change, deforestation, drought, and agriculture policies. You can start a milkweed garden to help the migrating monarch population through Texas on their way to Mexico!

Learn more about sustainable wind energy and the inspiring true story of William Kamkwamba in the book: *The Boy Who Harnessed the Wind*.
